About This Content

Night Environment completely revolutionizes night flying in the FSX: Steam Edition world. Using a series of databases, Night Environment adds brilliant, realistic lighting to your simulator. Thousands of lights clearly show how highways connect to cities and how smaller roads meander through neighborhoods. Visual navigation at night becomes a real treat – it's even easier than flying VFR during daytime, as it often is in the real world.

The Night Environment database contains many more roads than default FSX: Steam Edition, illuminating roads which are not visible during the daytime. All lights are visible for up to 60 miles, creating an authentic and dazzling flying experience complete with 3D effects.

Night Environment: Dubai for FSX: Steam Edition includes full coverage of the United Arab Emirates (Abu Dhabi, Ajman, Dubai, Fujairah, Ras al-Khaimah, Sharjah and Umm al-Quwain), and the Night Environment Manager v1.8, which is a separate configurator tool accessed via the Steam tools menu allowing you to adjust night lighting brightness, glow and colour hues.

Features:

- Full coverage of United Arab Emirates (Abu Dhabi, Ajman, Dubai, Fujairah, Ras al-Khaimah, Sharjah and Umm al-Quwain).
- All major roads and most smaller roads are illuminated
- Compatible with other scenery add-ons (including Orbx FTX and most photo scenery)

- Configurable for hardware performance
- Management tool, accessible via the Steam Tools menu, which allows you to toggle and adjust the output of all types of lights

Title: FSX Steam Edition: Night Environment: Dubai Add-On
Genre: Simulation
Developer:
Chris Bell - Creative Design Studios
Publisher:
Dovetail Games - Flight
Release Date: 4 May, 2017

a09c17d780

English

一眼就看到小琴坐在桌上，沒有想像般埋頭大哭，她只是雙手撐在身後，
微仰著身向上看著。

If i had a kid, it would be this game. Cool game but really frustrating!!. Worst and laziest made HOG I've ever played. The objects are just the same items over and over on different backgrounds with little or no list variation. Waste of money at any price. I usually enjoy the Hide and Secret series but this is awful.. Nice graphics, easy to learn controls, and my daughter who is on the spectrum enjoys playing it.. Bad game.
Bad graphic.
Only the achievemnts are good.. couls do whith mission were you nock down houses. Great Engine. Cute game, but 35+ hours of playtime isn't true. Experience that one scene in Family Guy about how Bertram was conceived.

Nice little game, not to easy and very enjoyable.. This game very hoorroorr serem coek. *Update* The Developer flagged all of my screenshots as violating community guidelines even though they are just shots of their game. So regardless of whether the game gets better or not, the dev obviously has no problems abusing their customer base. Caveat emptor.

A good start but there is nothing to do.
1v1 multiplayer via direct lan connection is fine but is fairly optimistic given the price and the fact that it is early access.
Maybe once the rest of the features have been implemented, this will be good.
Right now, I can't recommend it.

https:\/\/youtu.be\/L41V-aF7GCo. Great game, I am loving every second of it!

The graphics are great, the music is great, the gameplay is very entertaining, the story is interesting and there are references and memes spread around. Although apparently hard for some people, The Disappearing of Gensokyo can be played and enjoyed by anyone, but mostly Touhou fans.

The only thing that I don't like about the game is the lack of graphic settings customization. I would really appreciate it if it was there. I would also like to change the bloom effect's intensity and threshold.. This is the best VR Baseball game available. Perfect mechanics. Several environments to choose from. Developer was great to talk to, as well. That never hurts. It has realistic modes and ridiculous modes, but it's always a workout. I can't recommend this one enough.. If Crimson Skies: High Road to Revenge made it to the PC, DogFighter would be it. Really recommend it to fans of arcadey flying action games! You can use keyboard and mouse, but I strongly suggest using a controller.. This game is fun up to a point, after which it starts feeling repetitive. It has a steep learning curve for those that like a challenge.. I liked the idea and the texture-less design but after starting the game I start flying off the map for some unknown reason :|
