About This Game

Yargis is a fast paced, top down spaceship shooter inspired by star control, subspace and similar titles. Customize your ship to join a battle online or offline. Yargis is focused on team based, close combat action. The game has a variety of battle and co-op game modes and a powerful editor make Yargis a great game!

CONTROLS: Hold down W for Thrust, use the Mouse to steer, and Space for brake. Customize controls in settings > controls for asteroids style non-fixed. <http://steamcommunity.com/sharedfiles/filedetails/?id=646975914>

Compete head on with other players online, over a LAN, or play against the computer offline. Game modes include:

- King of the Hill
- Capture the Flag
- Prison Break
- Base Conquer (Co-Op)
- Maze Race and CTF (Capture the Flag) Maze

- Melee Battle

Yargis is a pilot for the Earth's military in the year 3013. Despite having explored far beyond Pluto and Alpha Centauri, no contact with alien life has been made. Until now; an unknown species only known as the Mukka are attacking Earth and its inhabitants. It's up to Yargis to defend Earth and help uncover their fiendish plot, while trying not to get blown to smithereens.

- Blow up enemies.
- Navigate through asteroid fields
- Fly through nebulae, stars and space stations

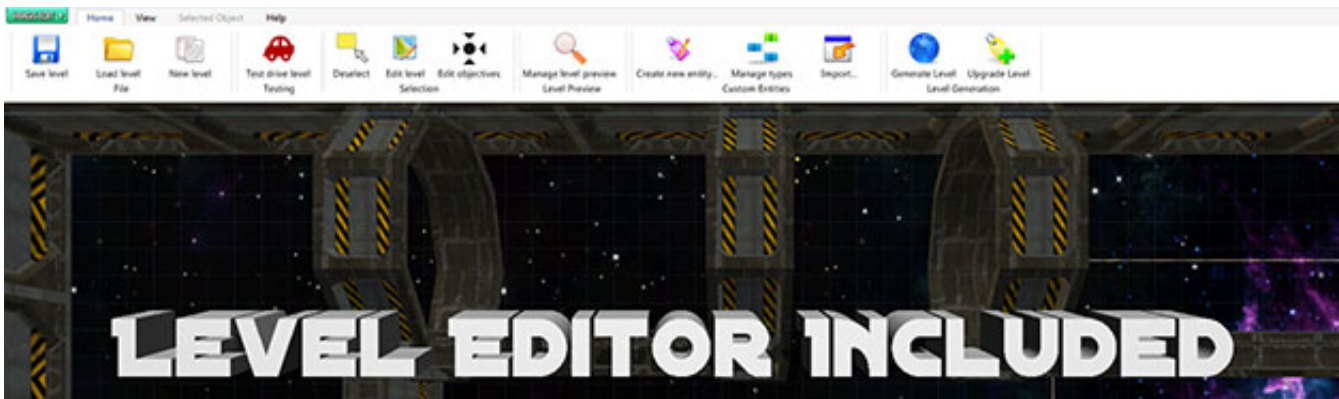

Compete with your friends in a multiplayer mode. You can play with your keyboard, mouse or with a game controller.

You can earn money and experience points in game by playing both single player and multiplayer. Level up your character to buy cool new ships and use the money you earn to get new weapons and items. Granular upgrades can be used to improve the parts on your ship.

Yargis' game physics are based in real world physics: your ship has momentum and is affected by gravity. Explosions push your ship and even firing a weapon may affect your ship as well.

Easily create levels with *drag and drop* items and Lua scripts for more powerful features. Your friends can instantly download the levels you create by joining your local or dedicated online server.

This is a pretty nice buy - yes, it might be true that MTG is slightly ripping you off by making you pay extra money just so you have cards to build your decks with but A) It's not that much money to spend B) You're getting your money's worth when you buy it plus wayyyy more considering it gives you dozens of cards for only 5 or 10 dollars and C) It's completely optional - you can still unlock plenty of cards for deck building just by playing the game - these dlc packs are just a nice add-on to give you extra cards to enhance your decks with if you want to. My Opinion - the dlc is worth exactly what you pay for - and I was quite satisfied with what I received.. It's time 4 goosebumps

It's time 2 get scared xd. A hilarious tale of adventure, love, zombie clerics, overzealous knights, awkward wizards, and a sarcastic sword.

ONWARD!. This is the best game I have played in years! I couldnt stop thinking about all the lore for this game! Such as, Where are the rats travelling? Why are there landscapes filled with saws? And many more things. The Character development was brilliant! I hope to see more games like this to come!

Jest to najlepsza gra grałem od lat! Nie mogłem przestać myśleć o całej wiedzy o tej grze! Takich jak, gdzie szczury podróży? Dlaczego nie Krajobrazy wypełnione pił? I wiele innych rzeczy. Rozwój postaci był genialny! Mam nadzieję zobaczyć więcej gier, jak to przed nami!. This is not worth the download. This is one of my favorite games ever. I wish they did a remake of it. Storyline and gameplay are awesome. You can choose sides between the cops of the rebels. Game is old so graphics are from the times. Great game!. Lineage 2 is older and has better graphics & gameplay than that bugged clunky junk. the screenshots and the trailer are deceiving us, wasting ur time. but hey go for it if u wish, me ? - 15 min later i was asking for my refund =)

Very fun and immersive gameplay, evolve your organism anyway you choose while enjoying a calming soundtrack. This game had no issues with controller support and while being easy it is also very challenging from time to time. Easy to learn, Easy to play, an ok story (more like a narration for missions or "objectives") but altogether a great game!. Not really a game . . . but a lot of fun.

Just play as some fuzzy space ball and wander around planetoids while sucking up flowers and catching stars . . .

A nice way to relax after a day at the office. There is no point other than to just play it. Very colorful, very upbeat and positive.. rings don't show up in list after rebuilding. I don't have remember what I paid. But too much money were paid for this. I am a regret that I buyed it into my stem library. It's not very good even if a youtuber is you. Pewdiepie!

If you didn't find this review hilarious, you won't get much out of this game either. The primary joke is having heard of the references. Having heard of things isn't hilarious. If "all your base" still has you in stitches, this one's for you.. Pretty chill game. I give it a 7/10 or even a 8/10. Thought it would be ♥♥♥♥♥♥♥♥ at first but it turned out pretty ok.

. One of my favourite games of all time. Seriously addictive and really puts an interesting take on Arthurian mythology and legend. You can get some really interesting units too.. A Great experience.

I've been playing this from the start including the online version, and there are huge leaps in quality in the last few weeks.

Game play is quirky, and goals are obtuse, but I think that's intentional. Basically If you keep yourself alive you're winning, and what else you do is up to you.

It looks like their answer to hacking is to disconnect the game from the web player version right now. It makes things kinda quiet right now in multiplayer but I guess we'll see how that pans out, and on the upside you can now play directly with your friends via steam, which is a bit more relaxed than the previously manic "anything goes" web experience.

I love flying about which feels fluid in a way that many games miss somehow, and just running about as an animal is fun.

The landscapes are ok, with beautiful moments mixed with not so beautiful. Generally it looks good.

It's not educational, it's just mucking about.

I'd say if you ever wanted to run about like an animal in it's natural environment this game is for you, but obviously if you want huge story driven game or fps action then it's not.

Within it's remit I reccomends it :)

. Slow game disappointed that it crashes.\ud83d\ude14

Fall in, now! (1.1.7.4):

Hey everyone,

We're releasing the changes you may have seen in our announcement of the BETA branch patch notes. Now all of these changes are being released along with some few minor adjustments and fixes. Full patch notes below:

Patch notes (ver. 1.1.7.4):. **New casual puzzle game "Chocolate makes you happy" now available on Steam!:**

Hello, dear Gamer! We have prepared for you a new game, hope you like it! Thank you for your support us! Enjoy)

http://store.steampowered.com/app/749340/Chocolate_makes_you_happy/. **Vreal update:**

Thank you for supporting us during Early Access! We hear you loud and clear on adding new games and that is our #1 priority.

We'll have an update on new games with our next release. We update the app every two weeks, so please continue to let us know what you think and what games you'd like to see! We promise more games are coming, and soon.

Thanks to everyone who submitted bug reports since we launched a couple weeks ago; you helped us squash a bunch of them.

Below are all of the updates we've made since our last release and current known issues. For questions, or to request access to make content with Vreal, head over to <http://support.vreal.net>.

Updates:

-
- Party time! Excellent! We fixed a bunch of bugs for watching content together in a party. Thanks to everyone who submitted bug reports!
 - The Vreal app now asks you if you *really* want to unfriend someone when you try to unfriend them, you heartless person.
 - A few tooltips went rogue. They have all been corralled back to their assigned pens.

Known Issues:

- An updated list of known issues can be found on our user wiki, [here](https://vreality.atlassian.net)[vreality.atlassian.net].

General:

- Vreal is not yet optimized for disk usage or bandwidth consumption. If you are bandwidth or disk space challenged, you may wish to wait for our 1.0 release.

Viewing:

- Opening Vreal in the SteamVR dashboard using a Vive Pro will crash the app.
- Streams will occasionally auto-launch without prompt. This can occur for a number of reasons, but we're aware of it.
- Stream will occasionally display odd behavior while watching - it may speed up, slow down, or sometimes take a long time to load and then catch up later on.

Parties:

- Pausing while in a party can cause a desync between party members viewing that experience. Ex: One member could be 5:00 into the recording while another could be 4:30 into the recording.
- The 5th member in a party is sometimes unable to communicate with other party members via voice chat.
- After watching one recording in a party, the leader will see a message that other party members need to download content. This message is incorrect and the recording should still launch regardless.
- Game audio can occasionally stop working if multiple members have been paused/unpaused.

Vreal App:

- The Vreal app occasionally launches with just a black screen. If this lasts more than 10 seconds, relaunch the app.
- The Vreal app does not scale to full screen.
- App performance is poor on 4K monitor.
- The app does not load if there is no internet connection.
- If you unfriend someone, you will not be able to go back and add them as a friend.

Content creation:

- Previously unpublished/deleted content still displays in the dashboard and on the Watch/Home pages of the app. (These will not be visible by other people, and are only visible for the content creator)
- Recording 2D content using cameras in Arizona Sunshine can cause performance issues.

. Woven found a publisher: StickyLock Studios:

Woven, it is happening!. **1.0.10:**

Steamworks support added (authentication and achievements)

Mac OSX Savegame bug fixed

Unity 2018.2.3f1. **Anime Update Live!:**

We've just updated Max's Big Bust with brand new story content! This new update follows Max as she tracks down the MinX supplier that's hiding out at Anime Axon. Will Max find the supplier and shut down this drug smuggling ring, or is she being led on a wild goose chase?

This update adds approximately an hour's worth of new content to the game. If you encounter any bugs or errors either leave us a message on the Steam Discussion Boards or send us a message at lachedupgames@gmail.com.

Enjoy the update, and thanks for playing Max's Big Bust!

Cheers :)

Lach. **CrossCode 0.8.3 - Happy Halloween!:**

[www.radicalfishgames.com]

The title says it all: Happy Halloween! And what's best to go along with it? A new CrossCode update of course. And this time it's a rather spooky one! Let's get into the new additions right away.
